Data model v0.1

Restaurant operations app · SharePoint lists (Microsoft 365) · October 2026
32 entities: 31 lists + the Policies library. Generated from sharepoint-lists.json.

Diagram key

- Reference data
- Checklists & compliance record
- Repairs & maintenance
- Trading / EOD (finance)
- People & handbook
- Restricted / special category
- Open question to resolve

PK SharePoint item id **FK** lookup to another list **UK** unique (enforce unique values)

Types are SharePoint column types: Text, Note (multi-line), Number, Currency, Choice, MultiChoice, Date, DateTime, YesNo, Link, Lookup.

Lines (crow's foot): **||** exactly one · **|o** zero or one · **o{** zero or many. Comments: *required*, *indexed*, *set by flow* (written only by Power Automate), key pattern.

Categories of personal data

The following types of personal data are processed (UK GDPR). Lawful basis and retention are to be confirmed:

- Staff identifiers: name, work email / Microsoft account, home site
- Employment details: department, position, app role, shifts worked and hours
- Authentication data: kiosk PIN (stored only as a hash), device used
- Activity records: who recorded, completed, approved or voided what, with timestamps
- Training and qualifications: certificate types, issue and expiry dates, scans
- Guest data (minimal): guest names entered for comps, discounts, complaints and refunds
- Contractor and visitor details: names, company, phone, email, visit times
- Photos: check and fault photos (may incidentally show people)
- Special category data (restricted access):
  - Health data: fitness-to-work / illness exclusions
  - Health data: visitor and contractor health declarations

Open questions

Sites
Is EPOS 'gross' before or after discounts? This sets NetSalesRule for each site.

RulesThresholds
Every value starts unverified until a food-safety consultant signs off. Scotland reheat 82°C?

ReasonCodes
Discounts and comps share one reason list in the current form. Keep them separate?

ChecklistItems
Add an event time to everything for a per-site timeline? BusinessDate + Created + ClientRecordedAt already exist.

WorkOrders
How do contractors update jobs: reply to the email, or a Microsoft Forms link?

TradingSessions
Do any sites need an 'All day' session instead of a lunch/dinner split?

ShiftStaff
Hours and wage cost from a rota system later (Deputy / RotaCloud?)

FitnessToWork
Special category (health) data: confirm lawful basis, who can see it, retention. Never sent to AI.

Staff
Kiosk-only staff have no Microsoft account. Confirm device-account licensing and the PIN reset process.

Targets
What does finance's targets workbook look like? One row per site per day? Which columns?

Responses
Largest list (~300k a year). Archive yearly. Is a Purview 'record' label available on our plan?

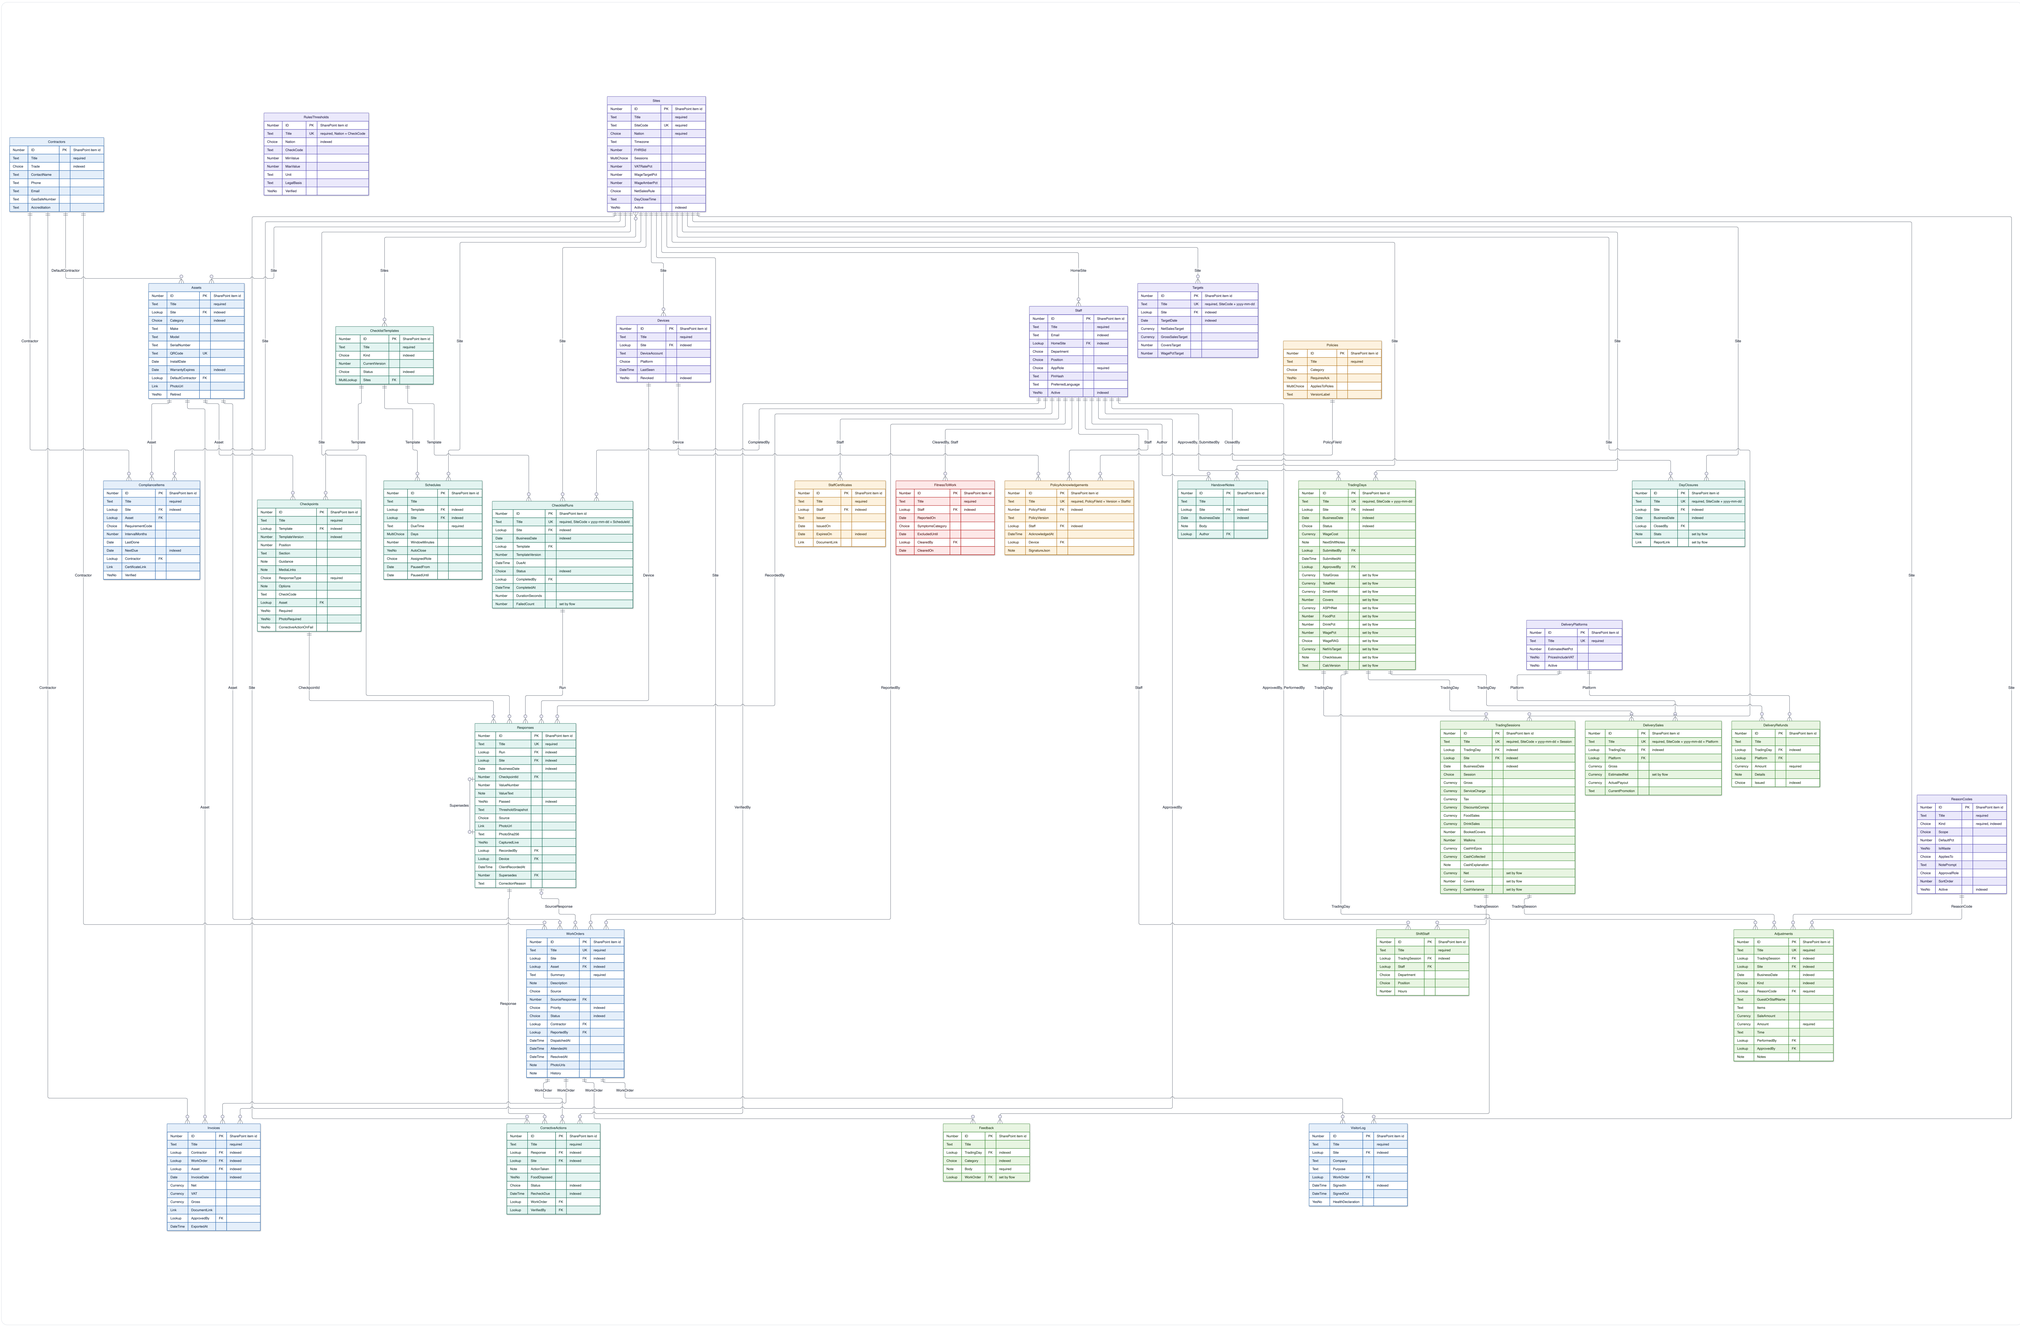

Checkpoints
Which media formats for how-to guidance: images, short videos, PDFs? Size limits?

ComplianceItems
Inspection intervals to verify: gas CP42, TR19, EICR, fire alarm, LOLER, PSSR, legionella.

DeliverySales
Keep the 55% estimate, or capture actual payouts weekly from platform statements?

PolicyAcknowledgements
Re-sign on every major version, or only for policies flagged RequiresAck?

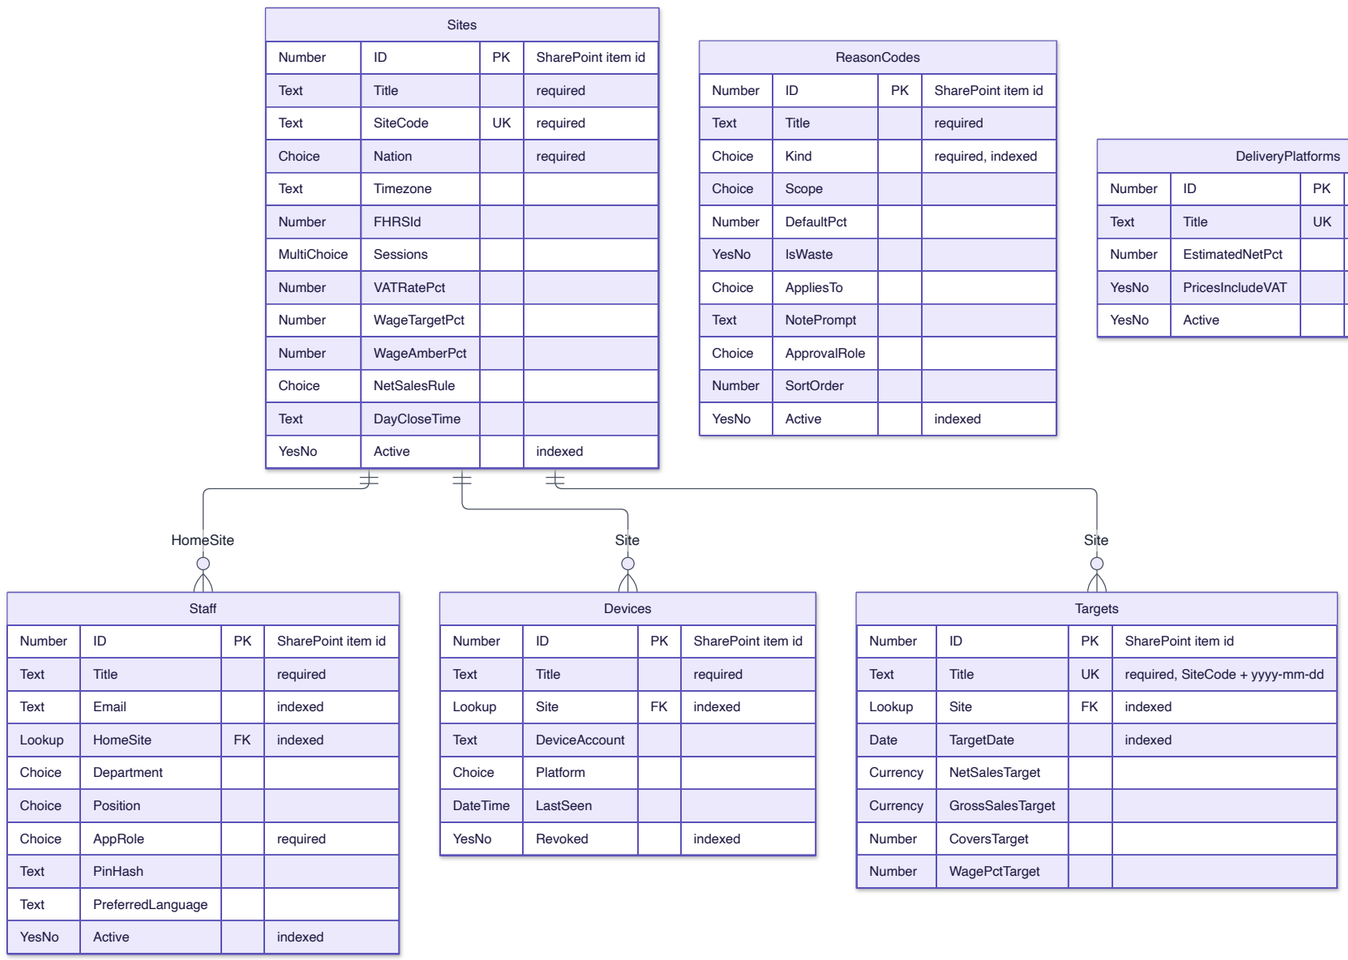

Policies
Not yet modelled: allergen matrix, tip allocations, ERA 2025 holiday records (phase 2).

AREA 1 OF 5

Reference data

Set up once and rarely changed: the restaurants, people, devices, food-safety limits, reason codes, delivery platforms and daily targets. Sites is the hub entity: almost every other list looks up to it. Entities shown with only their ID belong to other areas.

Sites
Is EPOS 'gross' before or after discounts? This sets NetSalesRule for each site.

Staff
Kiosk-only staff have no Microsoft account. Confirm device-account licensing and the PIN reset process.

RulesThresholds
Every value starts unverified until a food-safety consultant signs off. Scotland reheat 82°C?

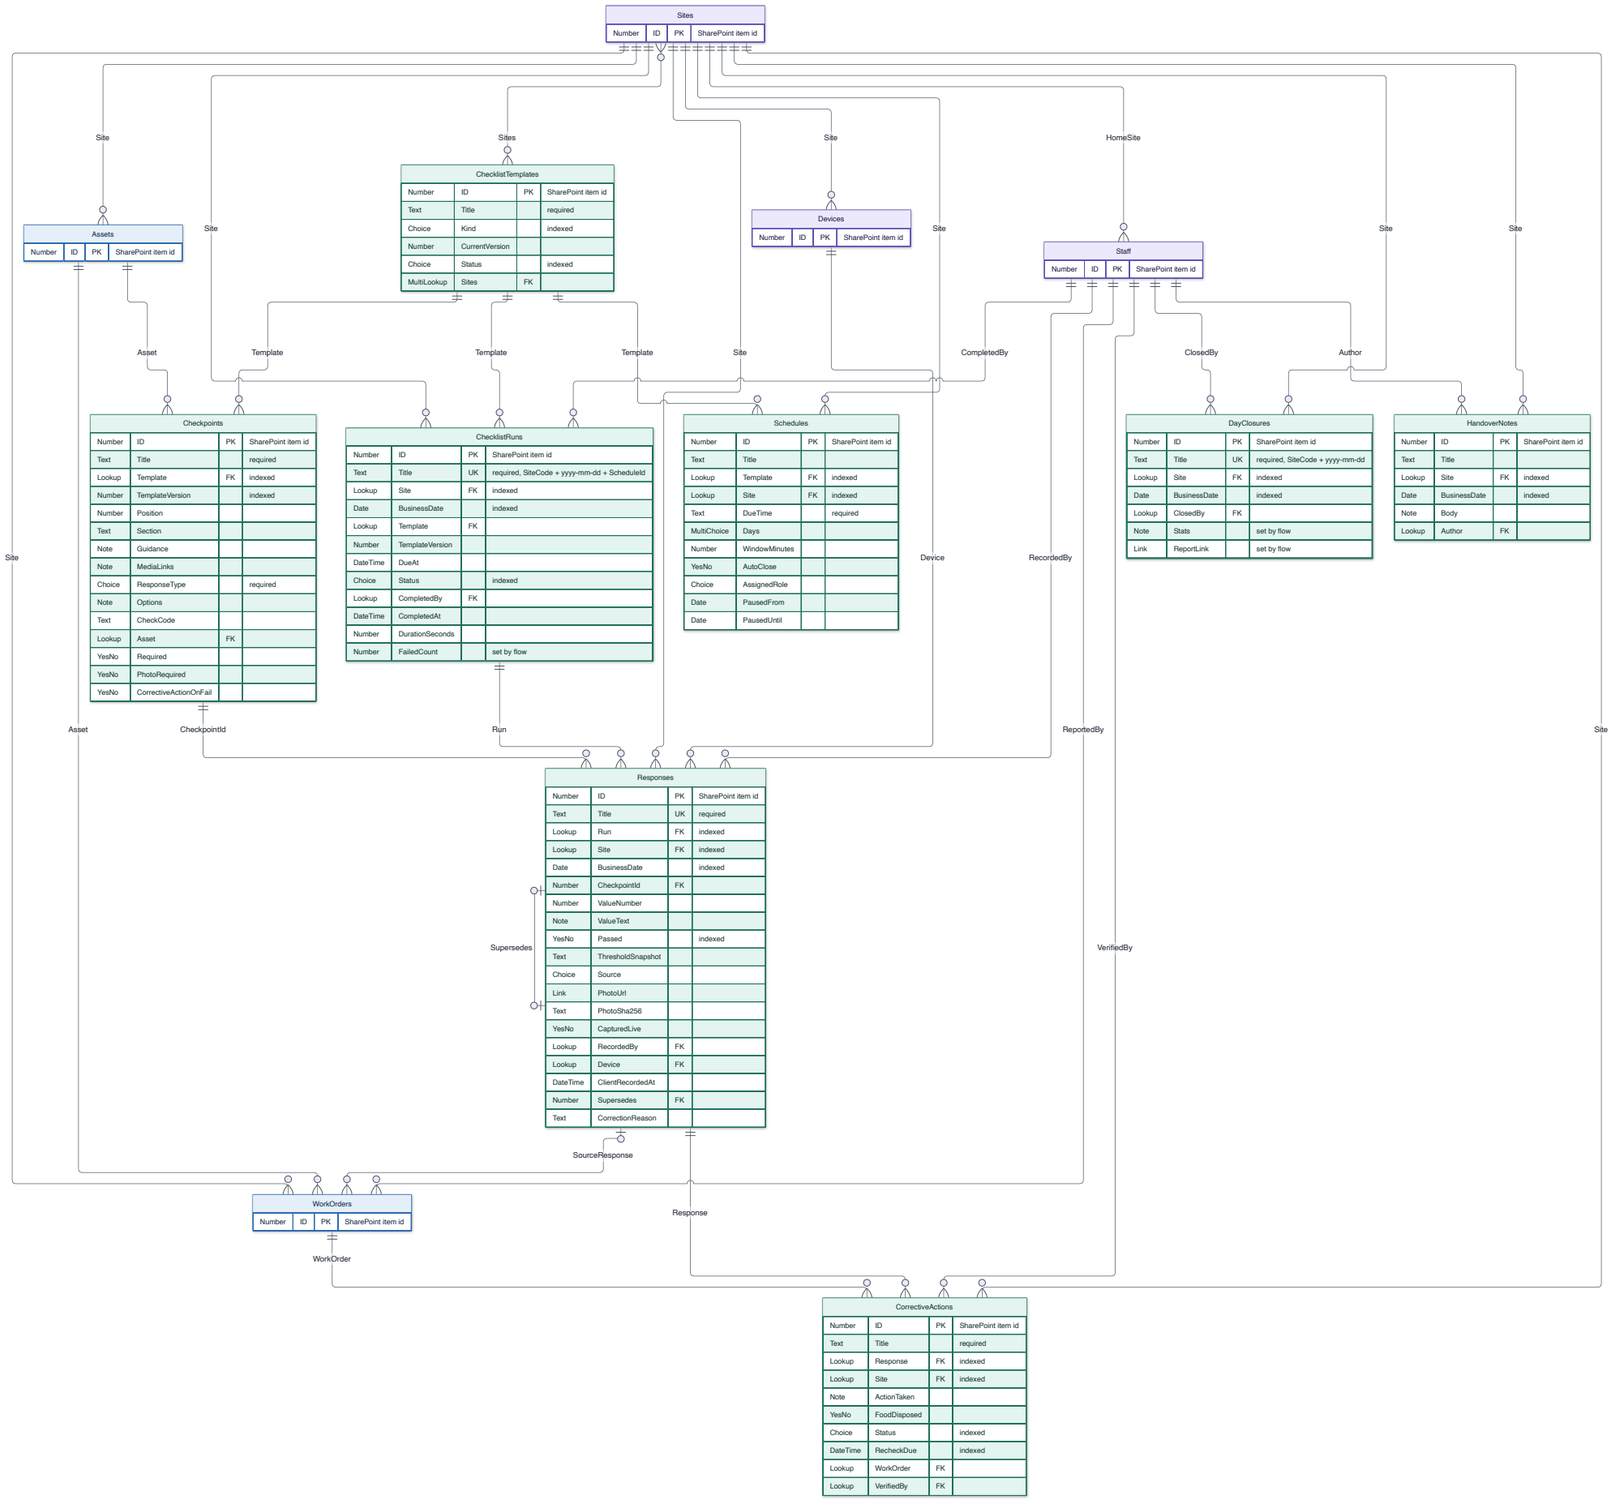

ReasonCodes
Discounts and comps share one reason list in the current form. Keep them separate?

Targets
What does finance's targets workbook look like? One row per site per day? Which columns?

AREA 2 OF 5

Checklists and the compliance record

Templates hold versioned checkpoints (the customisable questions with guidance and media). Each morning a ChecklistRun is created per schedule. Every answer is a Response, and failures create CorrectiveActions. Entities shown with only their ID belong to other areas.

ChecklistRuns
Add an event time to everything for a per-site timeline? BusinessDate + Created + ClientRecordedAt already exist.

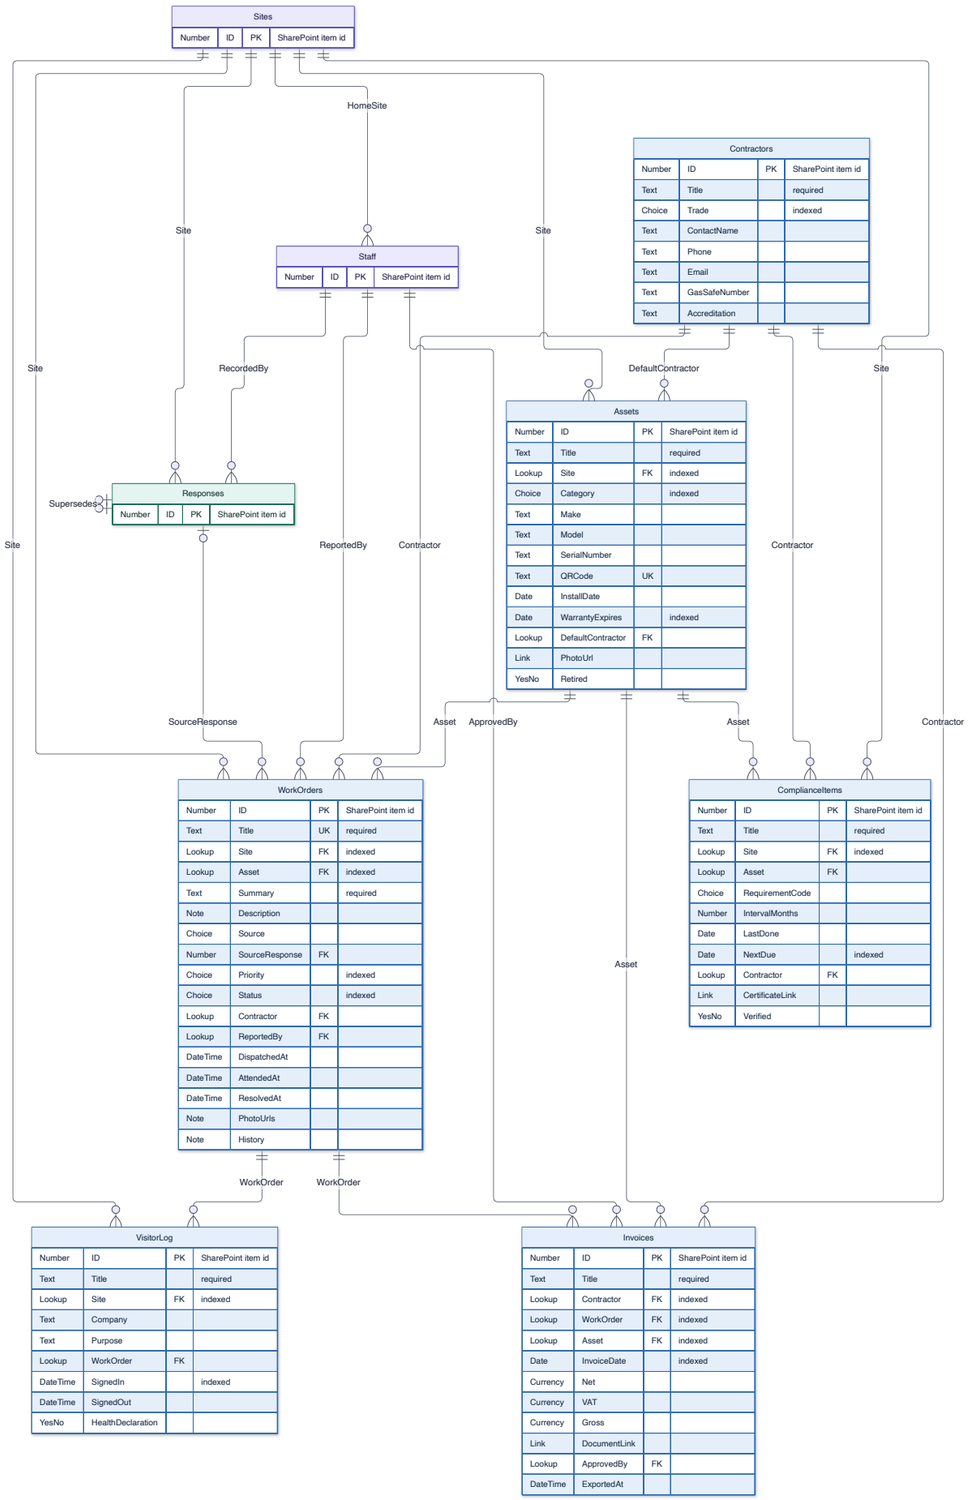

Checkpoints
Which media formats for how-to guidance: images, short videos, PDFs? Size limits?

Responses
Largest list (~300k a year). Archive yearly. Is a Purview 'record' label available on our plan?

AREA 3 OF 5

Repairs and maintenance

Assets (with QR codes), contractors, work orders and their invoices, the statutory compliance calendar and the visitor log. Work orders can come from failed responses, corrective actions or EOD feedback. Entities shown with only their ID belong to other areas.

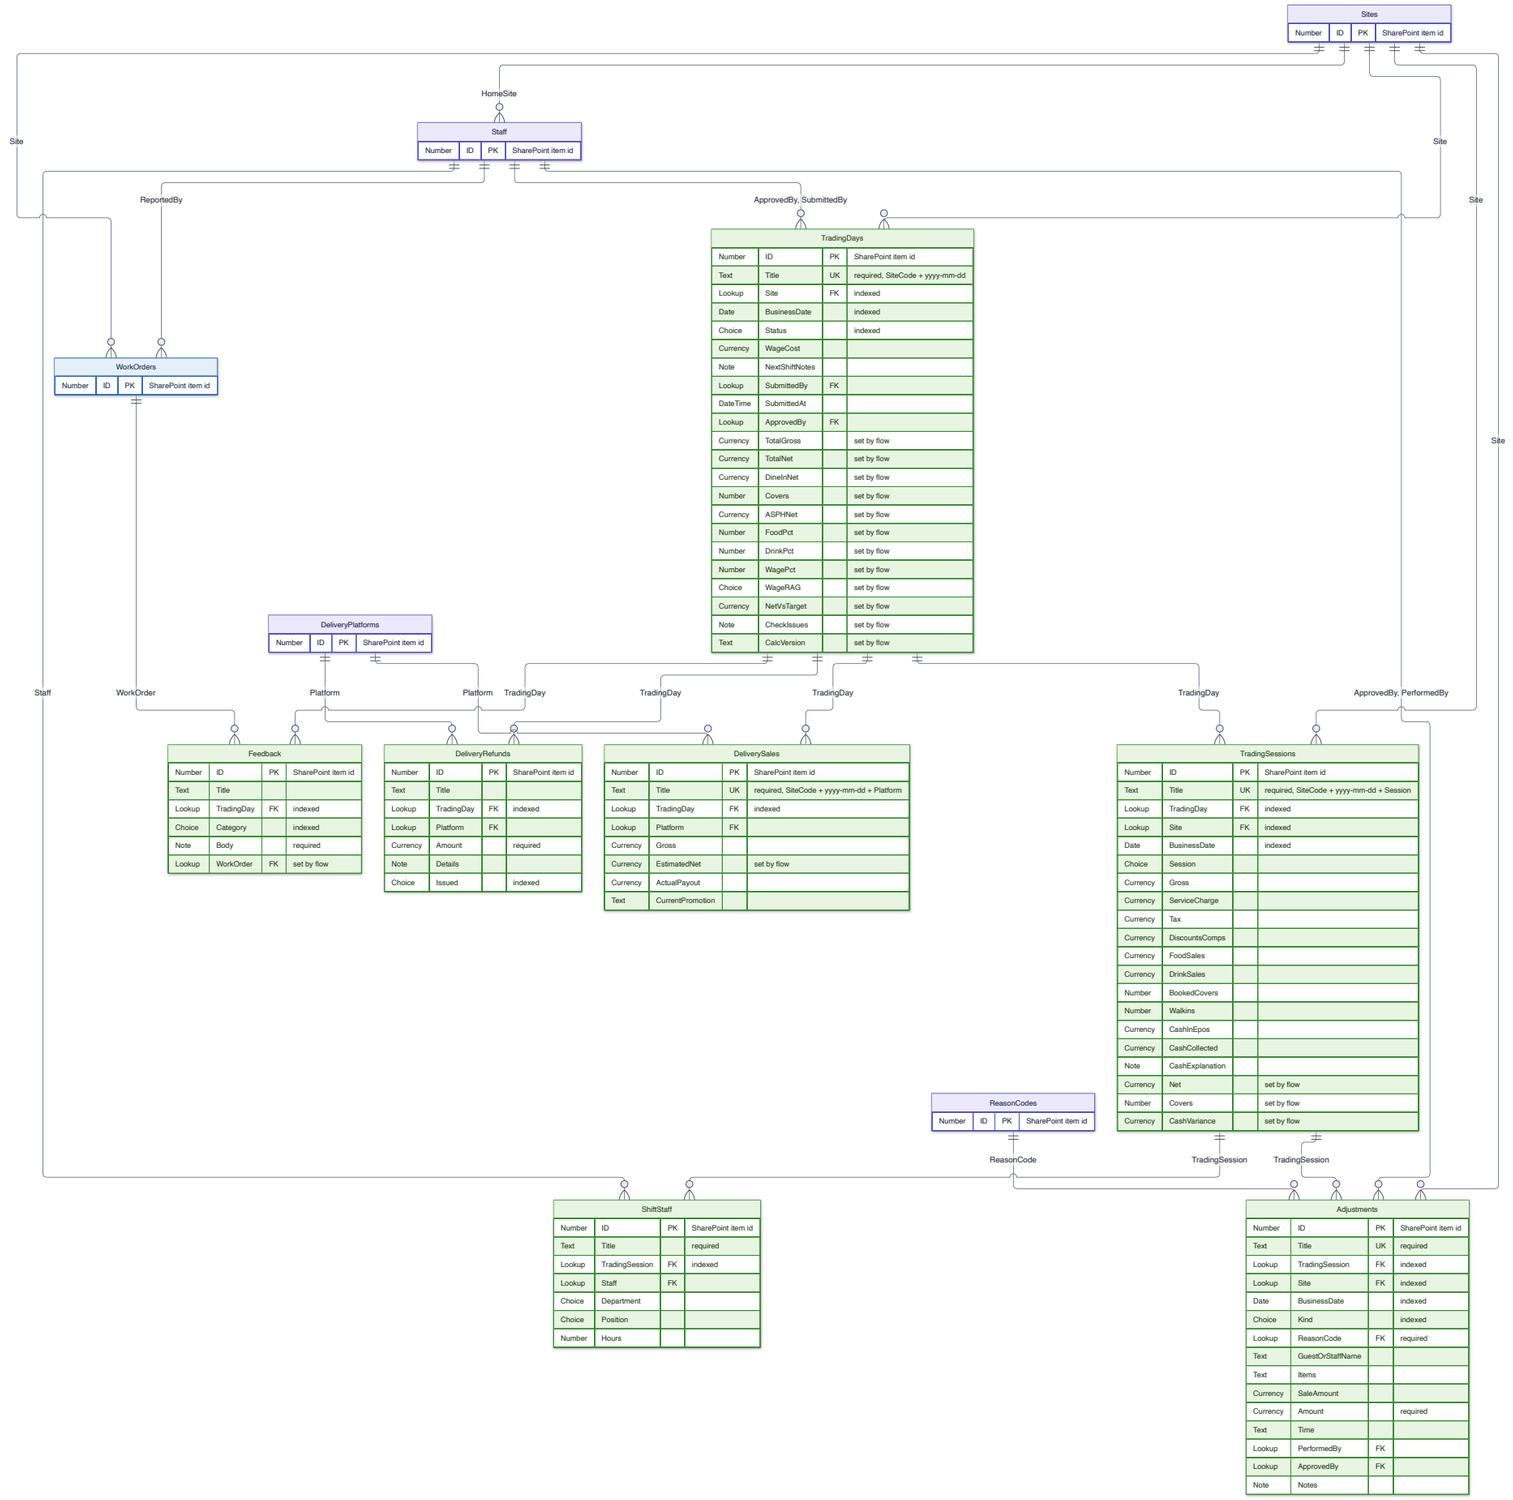

WorkOrders
How do contractors update jobs: reply to the email, or a Microsoft Forms link?

ComplianceItems
Inspection intervals to verify: gas CP42, TR19, EICR, fire alarm, LOLER, PSSR, legionella.

AREA 4 OF 5

Trading / EOD (finance)

One TradingDay per site per date, holding lunch/dinner TradingSessions with their discounts, comps and voids (Adjustments), the staff on shift, delivery sales and refunds, and feedback. Columns marked 'set by flow' are written by Power Automate flow F01. Entities shown with only their ID belong to other areas.

TradingSessions
Do any sites need an 'All day' session instead of a lunch/dinner split?

DeliverySales
Keep the 55% estimate, or capture actual payouts weekly from platform statements?

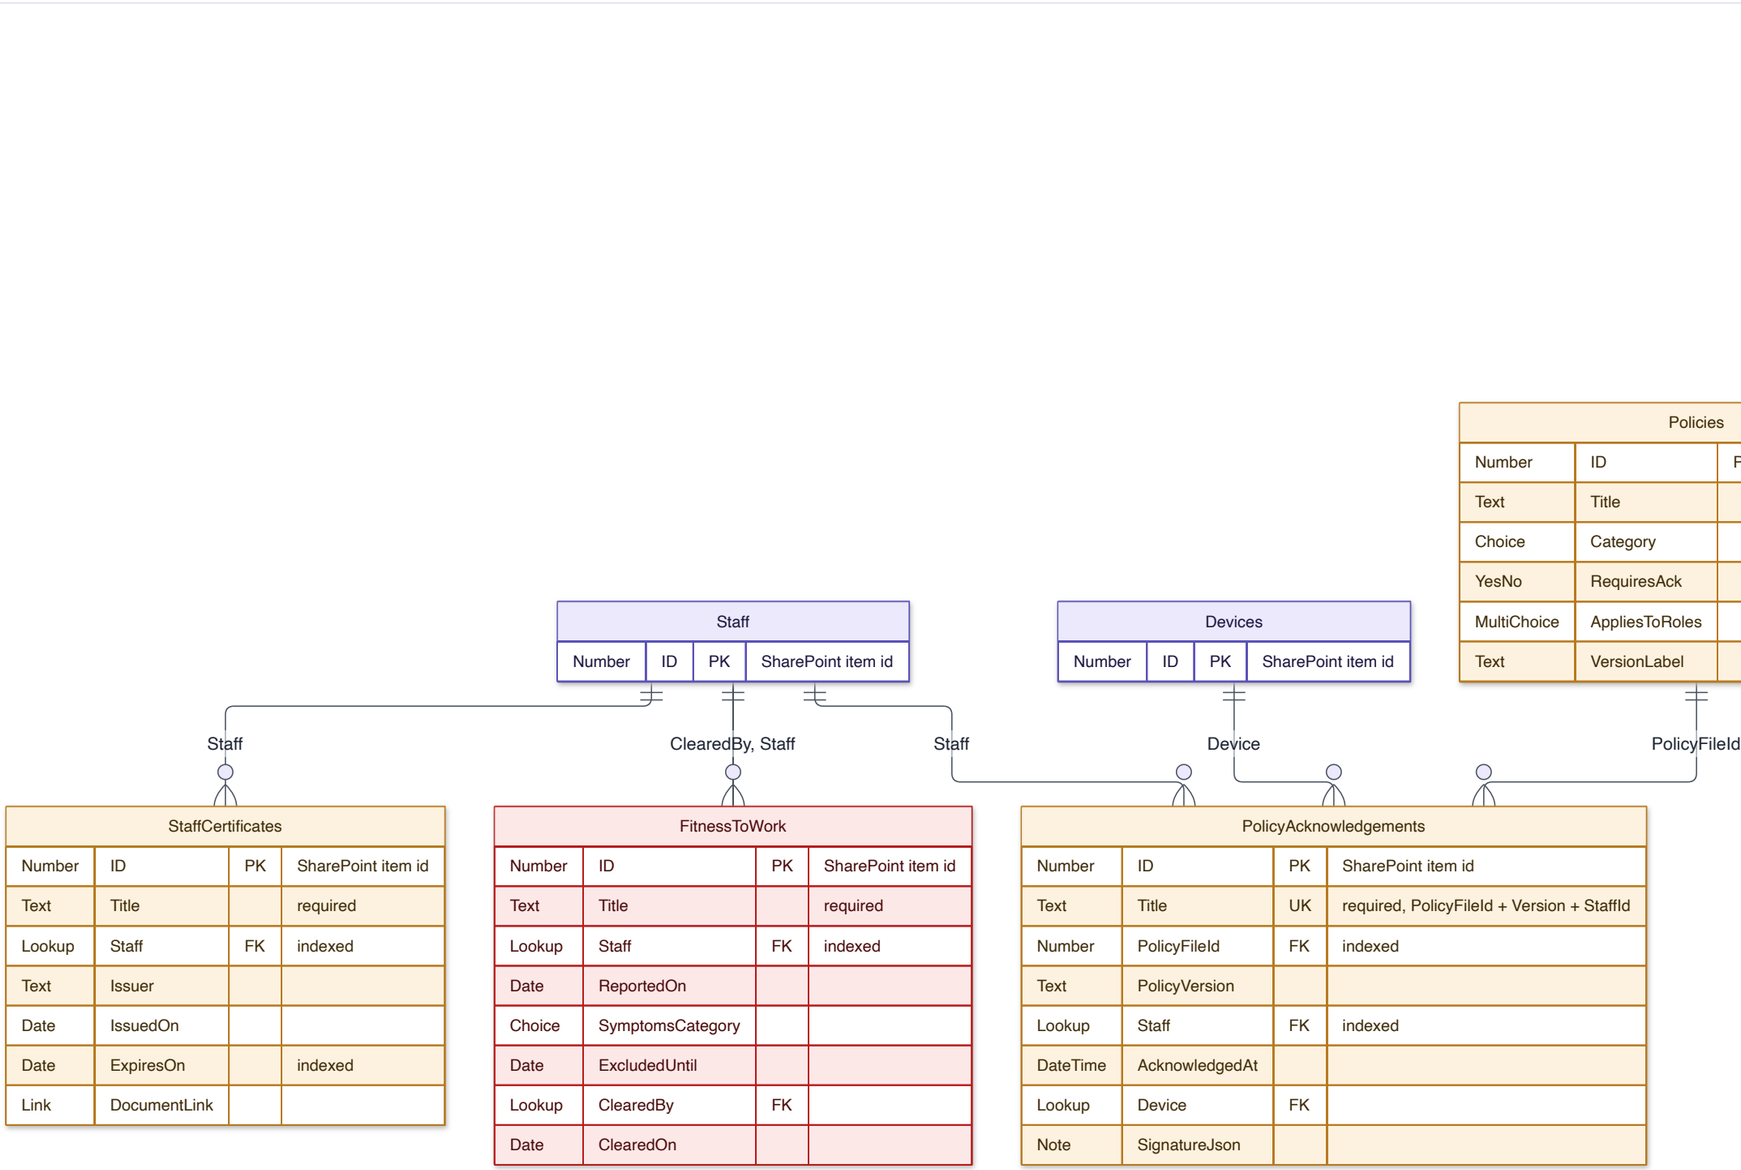

ShiftStaff
Hours and wage cost from a rota system later (Deputy / RotaCloud?)

ReasonCodes
Discounts and comps share one reason list in the current form. Keep them separate?

AREA 5 OF 5

People and handbook

The policies library with versioned documents and e-signed acknowledgements, staff certificates, and the restricted fitness-to-work list. Entities shown with only their ID belong to other areas.

PolicyAcknowledgements
Re-sign on every major version, or only for policies flagged RequiresAck?

FitnessToWork
Special category (health) data: confirm lawful basis, who can see it, retention. Never sent to AI.

Policies
Not yet modelled: allergen matrix, tip allocations, ERA 2025 holiday records (phase 2).
